COMPANY PROFILE

Mega Infratech and Projects is a well known name in the world of Corporate Service Providers. We are working in this field from the last 15 years, catering to the needs of our clients to their satisfaction. We are engaged in Modular Office Furniture Systems, Wooden Furniture, Turnkey Interiors, Exterior Face lifting and providing all kind of solutions in lieu of Supply and fixing of Commercial Electrical and Electronics products, capable of managing all related queries of the corporate clients as well as individuals.

We are group of young building & interior designers working under the guidance of an experience of over 15 years with innovative ideas, having a complete infrastructure for executing the assigned work as per our client's specifications & requirements. Our objective is to serve our clients with best possible way to assist them in achieving their goals with strict quality control measures including completion of the job within agreed time bound working schedule.

Core Competencies:

Time Management

Material / Quality Management

People Management

Cost Management

These are our key components of projects which are of utmost priority in all our projects and handled very efficiently by our team. All these components assist directly in completing the project on time with utmost cost effectiveness resulting in Customer's delight.

MIP GLOBAL (A Unit of Mega Infratech and Projects) has a workshop area in the heart of the city which is equipped with all modern technologies facilitating custom made furniture which effectively reduces the time frame for onsite execution.

Aligning creativity with our client's mind is both challenging and rewarding. And, that's what we do, every time. For each of our projects, we challenge ourselves in finding out the unique look. Matching this uniqueness with the personality leads us to choose and offer the right and direct choices for our clients to finalize the interiors & furnishings that sketches the mood to desired results. MIP GLOBAL makes sure that we adapt and design an environment to match the resident's current and future identity. At the end, we begin by delivering the interior design concepts which surprises one and all.

MIP GLOBAL has acquired experience & expertise to cater the requirements of various works on basis for a variety of jobs that include the following:-

Quality, personality and functionality are the pillars on which our ideas take shape. We share a common wavelength with our valued clients and assure them complete support - everything from concept to finish.

FOCUS

The Vital components of any interior project are well addressed in all projects undertaken by our company. Those are:

Design Concept:

Concept behind the design is always the optimum utilization of space & to create a healthy, economical & user friendly environment. We try to create a wide variety of interior environments from traditional, contemporary to modern. We strive to develop interior spaces with an underlying classicism that survives the passage of design trends. We are committed to coordinating the design efforts with an organized and well managed project that consistently exceed clients' expectations and come in on budget. The end result are rich environments defined by sophisticated color palettes, refined materials and detailing that tailor these interiors to suit the clients' desires.

Strict Quality Control:

No compromise on Quality on any of the project undertaken as this is the only aspect which shall sustain us in the professional arena in long run. Our quality only speaks for us.

Time Factor:

The company follows the time frame structure in any interior or exterior project. The work must be completed within the time limit as set out earlier without ignoring specifications. We calculate all the time required in a systematic manner keeping all the steps intact which will follow one after another in the execution of the project, to ascertain the time duration & then strictly follow the same. Our aim is '**Time Is Money**'

Costing:

Costing is the prime factor which is been carefully monitored from the start to the completion of the project. The increase of cost of overall project is due to wastage of material at site because of ineffective & inefficient supervision. We have skilled and trained supervisors for reducing avoidable wastages to an absolute minimum. That leads to a good quality product at the best possible price.
